

CISC 897 – Research Methods in Computer Science

Fall 2016 – Review # 3

Due Nov 11th, 2016 in class

Task 1 – Reflections on 3MT feedback

Well done, by now you appreciate the difficulty of practicing your elevator pitch, and having a ready-to-go overview of your research and why it matters.

After your 3MT presentation, you each received feedback (scores + comments) from all your peers. Please go over all the comments and scores, reflect on what they mean, and write a short review on your feedback, reflections, and action plans.

Your review should have the following 4 headers:

- Comprehension
- Engagement
- Communication
- Overall presentation style

Under each header, discuss:

- The most notable (or repeated) comments
- Discuss whether you believe they are 3-minute specific, or general to your presentation style
- What would you do differently for each of these (main) points

Attach all feedback sheets to your review. I'll return them to you with the graded review.
